Job Description

We are looking for a Full Stack Developer to produce scalable software solutions. Your primary focus will be on developing user interface components and implementing them following well-known React.js workflows (such as Flux or Redux). You will ensure that these components and the overall application are robust and easy to maintain. You should also be a team player with a knack for visual design and utility. As a Full Stack Developer, you should be comfortable around both front-end and back-end coding languages, development frameworks and third-party libraries. You should also be a team player with a knack for visual design and utility.

Responsibilities

- Design client-side and server-side architecture
- React Js - Build the front-end of applications through appealing visual design
- Develop API using Python flask and mongodb
- Maintain code using GIT
- Write effective APIs
- Test software to ensure responsiveness and efficiency
- Troubleshoot, debug and upgrade software
- Create security and data protection settings
- Build features and applications with a mobile responsive design

Skills

- Write technical documentation
- Work with data scientists and analysts to improve software
- Knowledge of multiple front-end languages and libraries (e.g. HTML/CSS, JavaScript, XML, jQuery)
- Familiarity with databases (e.g. MySQL, MongoDB), web servers (e.g. Apache) and UI/UX design
- Handle client interactions

Internship Type

- Work from home

Salary

- First 2 months - ₹8,000.00 per month
- After 2 months - ₹15,000.00 per month
